PROFESSIONAL SUMMARY

- Computer Science Engineering student with experience in AI/ML, Deep Learning, RAG, and Agentic AI, along with strong knowledge of DSA, OOP, and databases. Passionate about building AI-driven applications and seeking opportunities in AI/ML and intelligent software development.

Education

Bennett University, Greater Noida, Uttar Pradesh,	2022 – 2026
• B.Tech - Computer Science Engineering CGPA : 8.3	
Alphores Junior College, Karimnagar, Telangana, Intermediate	2020– 2022
• Percentage : 96.4	
Paramita Heritage School, Karimnagar, Telangana	2019-2020
• Percentage : 100	

Technical Skills

- **Programming Languages:** C++ , Python
- **Core CS Concepts:** Data Structures & Algorithms, OOPs, Operating Systems, DBMS
- **Databases:** SQL, MySQL, PL/SQL
- **Machine Learning & AI:** Machine Learning, Deep Learning, RAG, Agentic AI
- **Web Technologies :** HTML, CSS, JavaScript

Internship Experience

Software Engineer Intern | Trangile Services Pvt Ltd

- Completed hands-on training in Artificial Intelligence, Machine Learning, GenAI, RAG, and Agentic AI concepts.
- Assisted in developing AI chatbot solutions using LangChain, LangGraph, and LLM-based workflows for intelligent query handling.
- Collaborated with teams to design, test, and enhance AI-powered conversational applications.

Projects

ROOTS OF CHANGE – Modernizing Agriculture | HTML, CSS, JavaScript

- Developed a web-based agriculture platform providing government schemes, crop guidance, fertilizer recommendations, and land/crop marketplace features for farmers.
- Built responsive frontend interfaces using HTML, CSS, and JavaScript with focus on usability and accessibility.
- Applied modular development and SDLC principles to create a maintainable platform and improve access to agriculture-related resources.

Agentic AI Chatbot | Python, LangGraph, LangChain, LLMs

- Built an Agentic AI chatbot using LangGraph and LangChain to enable multi-step conversational workflows and intelligent task handling.
- Implemented state-based agent architecture for managing conversation flow and improving contextual responses.
- Integrated LLM-based response generation and modular chatbot components to support scalable AI interactions.
- Gained hands-on experience in AI agent workflows, prompt orchestration, and conversational AI development.

Real-Time Hand Gesture Control | Python, OpenCV, MediaPipe, PyQt5

- Developed a real-time hand gesture control system using Python, OpenCV, and MediaPipe for volume, brightness, and mouse control.
- Built an interactive interface with PyQt5 and integrated system APIs for seamless automation.
- Implemented gesture recognition and tracking logic for accurate and stable real-time interaction.
